INTELLIGENT SAFETY

All New Sense of Confidence.

Honda SENSING is an Advanced Driver Assistance System (ADAS) designed to help you drive more safely by reducing the risk of accidents. It intervenes to avoid or lessen the impact of a collision. With every advancement we make, we get closer to a world without collisions.

-Low Speed Follow available with CVT only

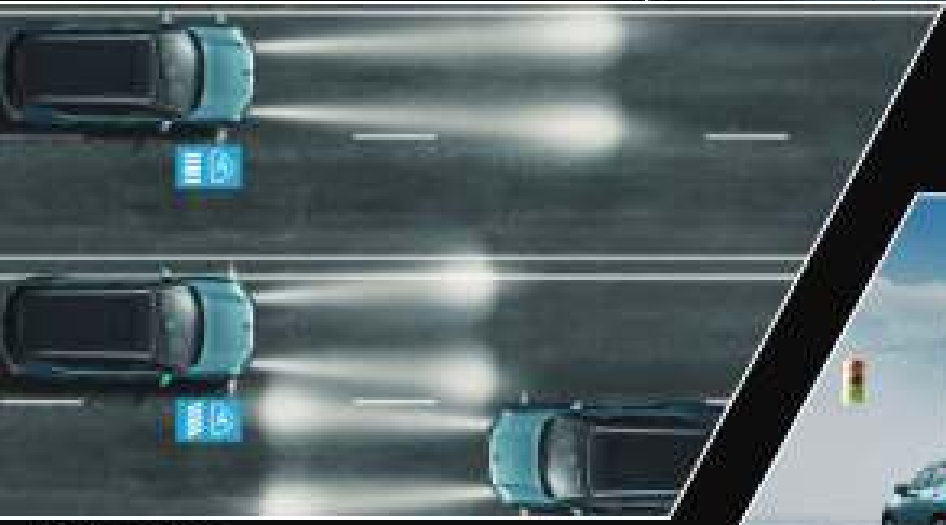

Collision Mitigation Braking System (CMBS)
Alerts and applies brakes when a collision risk is detected.

Adaptive Cruise Control with Low Speed Follow
Accelerates & brakes to maintain a safe distance from other cars while cruising. Low-speed follow makes it easier to drive in stop-and-go traffic.

Lane Keeping Assist System (LKAS)
Keeps the vehicle centred in its lane while cruising on highways.

Road Departure Mitigation System
Provides audio-visual alerts and steering assistance when the vehicle drifts from road boundaries.

Auto High-Beam
Automatically switches between low and high beams for improved visibility.

Lead Car Departure Notification System
Helps you stay aware by alerting you when the vehicle ahead begins to move.

Honda SENSING in Honda's exclusive Advanced Driver Assistance System (ADAS). Honda SENSING cannot substitute human awareness and vigilance while driving. Honda Cars India Limited urges drivers to follow traffic rules which are meant to keep them safe on roads.
